MULTIPLE CHOICE. Choose the one alternative that best completes the statement or answers the question.

Express the null hypothesis and the alternative hypothesis in symbolic form. Use the correct symbol (μ , ρ , σ) for the indicated parameter.

1) An entomologist writes an article in a scientific journal which claims that fewer than 14 in ten thousand male fireflies are unable to produce light due to a genetic mutation. Use the parameter p, the true proportion of fireflies unable to produce light.

- A) H_0 : p < 0.0014
- B) H_0 : p = 0.0014
- C) H_0 : p = 0.0014
- D) H_0 : p > 0.0014

 $H_1: p \ge 0.0014$ $H_1: p < 0.0014$

- $H_1: p > 0.0014$
- $H_1: p \le 0.0014$

Assume that the data has a normal distribution and the number of observations is greater than fifty. Find the critical z value used to test a null hypothesis.

- 2) α = 0.05 for a two-tailed test.
 - A) ±1.764
- B) ± 2.575
- C) ± 1.645
- D) ±1.96
- 2)

- 3) $\alpha = 0.09$ for a right-tailed test.
 - A) 1.96
- B) ± 1.34
- C) 1.34
- D) ± 1.96

- 4) $\alpha = 0.05$ for a left-tailed test.
 - A) -1.96
- B) -1.645
- C) ± 1.96
- D) ±1.645

Use the given information to find the P-value. Also, use a 0.05 significance level and state the conclusion about the null hypothesis (reject the null hypothesis or fail to reject the null hypothesis).

5) The test statistic in a right-tailed test is z = 0.52.

- A) 0.0195; reject the null hypothesis
- B) 0.6030; fail to reject the null hypothesis
- C) 0.3015; reject the null hypothesis
- D) 0.3015; fail to reject the null hypothesis

Formulate the indicated conclusion in nontechnical terms. Be sure to address the original claim.

6) An entomologist writes an article in a scientific journal which claims that fewer than 4 in ten thousand male fireflies are unable to produce light due to a genetic mutation. Assuming that a hypothesis test of the claim has been conducted and that the conclusion is to reject the null hypothesis, state the conclusion in nontechnical terms.

- A) There is not sufficient evidence to support the claim that the true proportion is less than 4 in ten thousand.
- B) There is sufficient evidence to support the claim that the true proportion is greater than 4 in ten thousand.
- C) There is sufficient evidence to support the claim that the true proportion is less than 4 in
- D) There is not sufficient evidence to support the claim that the true proportion is greater than 4 in ten thousand.

7) A psychologist claims that more than 7.1% of adults suffer from extreme shyness. Identif	y the	7)
type II error for the test.		
A) Fail to reject the statement that the percentage of adults who suffer from extreme sh	yness	
is less than or equal to 7.1% when that percentage is actually greater than 7.1%.		
B) Reject the statement that the percentage of adults who suffer from extreme shyness	is less	
than or equal to 7.1% when that percentage is actually 7.1%.		
C) Reject the statement that the percentage of adults who suffer from extreme shyness	is	
less than or equal to 7.1% when that percentage is actually greater than than 7.1%.	10	
D) Fail to reject the claim that the percentage of adults who suffer from extreme shynes	ss is	
greater than or equal to 7.1% when that percentage is actually less than 7.1%.	33 13	
greater than or equal to 7.170 when that percentage is actually less than 7.170.		
8) A skeptical paranormal researcher claims that the proportion of Americans that have see	n a	8)
UFO is less than 4 in a thousand. Identify the type I error for the test.	iia	
	or	
A) Reject the statement that the proportion of Americans that have seen a UFO is great	ei	
than or equal to 4 in a thousand when that proportion is actually less than 4 in a		
thousand.		
B) Reject the claim that the proportion of Americans that have seen a UFO is less than	or	
equal to 4 in a thousand when that proportion is actually less than 4 in a thousand.		
C) Fail to reject the statement that the proportion of Americans that have seen a UFO g	reater	
than is equal to 4 in a thousand when that proportion is actually 4 in a thousand.
